Exit Questionnaire- Law boost

1. Did the course meet my expectations? Actually, the course exceeded my expectations. I thought we would only focus on writing. However, examining cases, researching and pointing out important facts really help my understanding of (1) how attorneys arrive at a point of view and (2) How to articulate that point of view on paper for the reader. I was very pleased.
2. Yes, course work was presented well, ideas discussed, transcript notes well-organized and clearly conveyed.
3. The assignments was beneficial because we could actually practice what was being discussed and taught.
4. What I like most about course was the structure of online chatroom. We could at anytime enact with the professor either ask questions or make comments. However the five day format could be extended to 7-10 days because of so much material.
5. I would absolutely recommend this course to a friend who was considering law school for the reasons mentioned above- online format, chatroom structure and offline assignments.
